

Homeworx New Homes Design & Build

Homeworx Office Gets an Upgrade

Our Meeanee office carpark has received a long overdue upgrade. All the old concrete has been ripped up and replaced, and new landscape strips added.

We've also adding a cedar feature to the entry and improving the signage.

Keep an eye out next time you drive past!

More Flexible Options to Build Your Dream Home

We now offer two pathways to bring your dream home project to life.

Design and Build

We have established trusted partnerships with select independent builders who share our commitment to quality and service. If you choose our design and build option, one of our partner builders will be building your home under the guidance of our project support services. You'll benefit from rigorous quality control, personalized service, ring-fenced progress payments, and a seamless process from start to finish.

Design Only

Prefer to work with a builder you already know and trust? No problem. We will prepare detailed building plans and secure your building consent, then pass everything along to your chosen builder to proceed.

New Home Design Trends

While indoor – outdoor flow has been a must have in new homes for a long time, it has taken on even more importance with the desire to seamlessly blend indoor and outdoor spaces. This is achieved by using expansive windows, living walls, boardwalks and natural materials, to foster a deep connection to nature. This trend not only promotes sustainability but also enhances wellbeing, creating serene sanctuaries that inspire creativity and rejuvenation and enabling you to experience the harmony of modern living and nature like never before!

Homeworx New Homes Design & Build

Annika's Antics!

Fifteen months ago our daughter, Annika, left the family business for a new life adventure in Australia with her husband and their two young boys.

They have managed to settle into a nice area of Brisbane and both got good jobs: Dylan working in gourmet butchery; and Annika as an interior designer for a large Australian builder.

There are ten interior designers based in the company's head office just South of Brisbane. We had the chance to see Annika at work during a recent Brisbane trip.

Check out the photos of our visit below:

HOMEWORX 60M2 GRANNY FLAT

Check out our innovative 60 m² Granny Flat design. It features two spacious bedrooms, a full-size kitchen, and a cozy dining and living area that flows seamlessly outdoors.

A full-size kitchen isn't just a luxury; it's essential for comfortable, sociable living. Imagine cooking gourmet meals for friends and family, making every gathering special!

This proven design maximizes space while maintaining a welcoming atmosphere. And with regulations likely changing around Christmas, now is the time to act!

Don't wait! We have a special offer: we'll cover the building consent fees for any Granny Flat we build before the regulations change.
